Ming Snow White	15-20mm	24
Ming Snow White	20-30mm	32
Ming Snow White	30-50mm	40
Ming Snow White	50-100mm	50

Calculations

All measurements are at one layer deep. For complete coverage 3 layers are required.

Please note that the depth of an individual layer is the same as the size of the chosen pebble. If you choose a 5mm pebble, one layer therefore is 5mm deep.

FORMULA:

(square metres x amount of layers x kg coverage) ÷ 20 = number of bags

** Note: This formula is only a guide. We take no responsibility for miscalculations based on this formula
